Need a composite door fitted in Oldham?

A door is an important part of any property. It welcomes you home at the end of a hard day or a long journey. It is the portal that protects some of your most cherished memories and prized possessions – including your family. It is only right that your front or rear door reflects and secures what is inside.

Homefit Doors in Oldham is a family-run business with more than 20-years' experience supplying and fitting composite doors.

Our expert fitters only install the highest-quality composite doors and have an extensive range with more than 300 colours and styles to choose from. Whether you are after a new front door or back door in Oldham, we have the perfect solution to meet your needs.

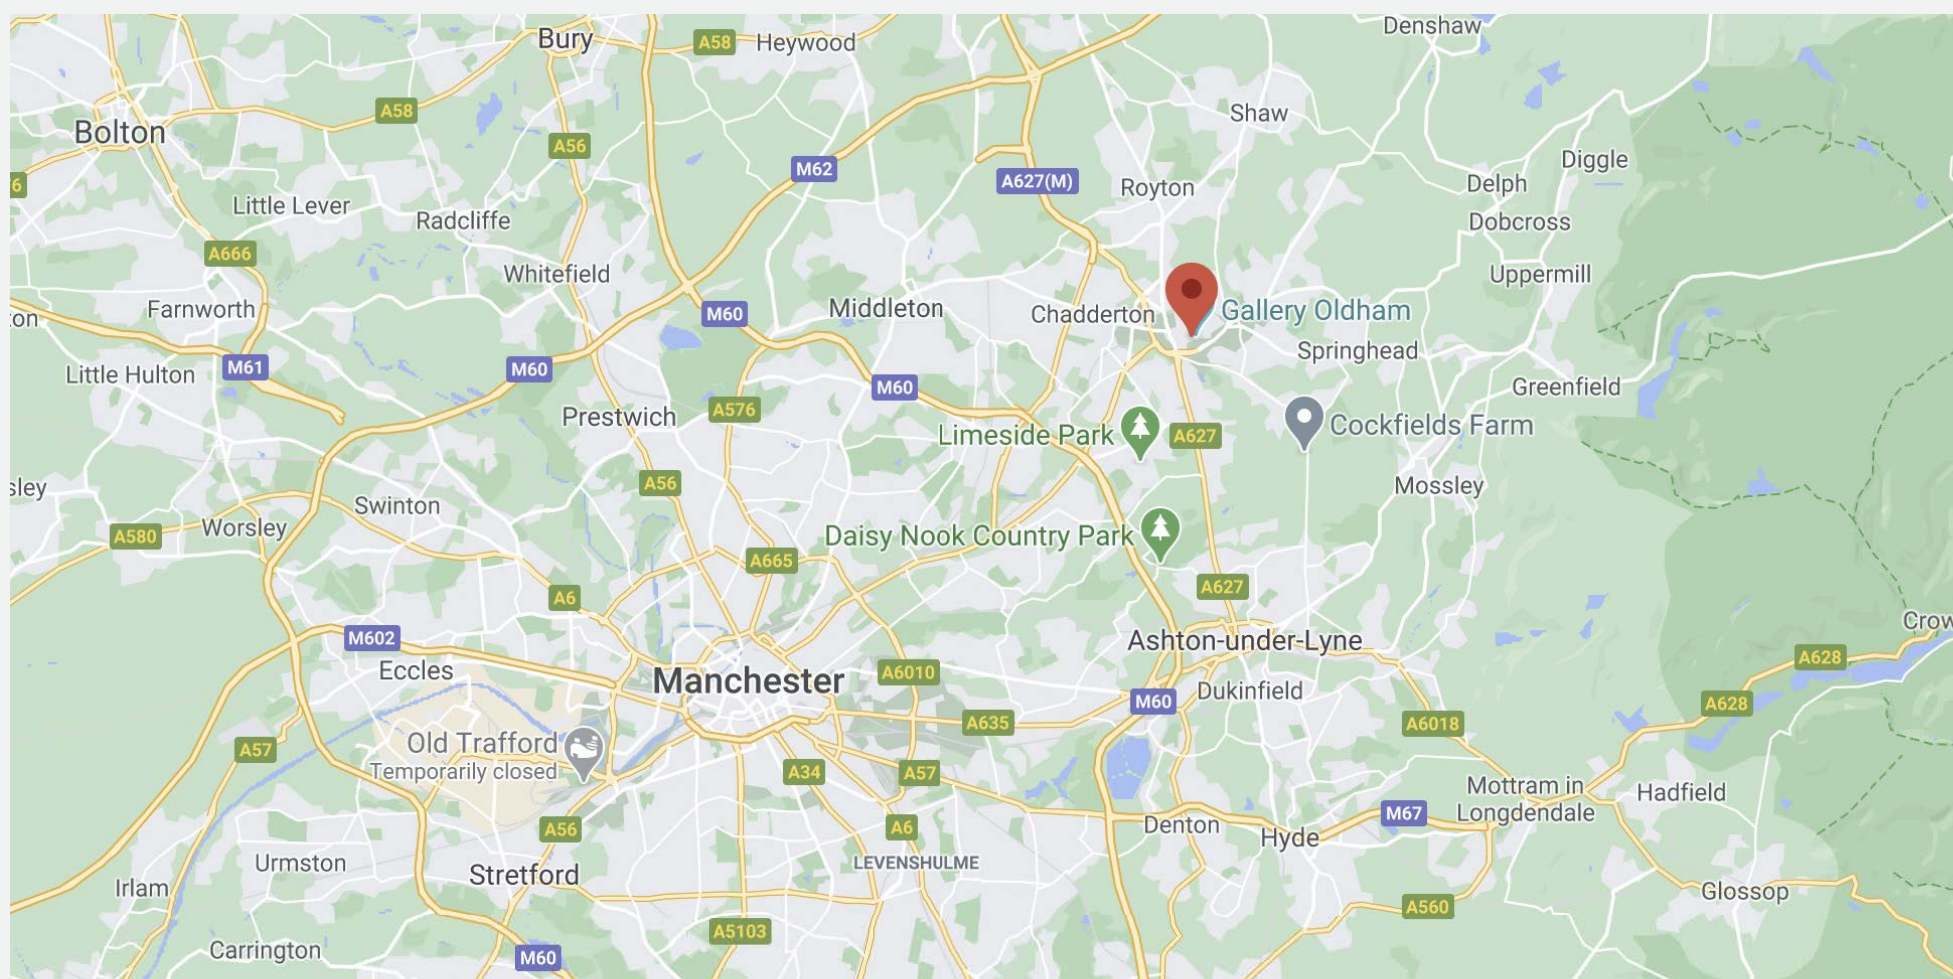

The composite doors we fit are bespoke and installed by our trained staff for the perfect draught-free fit, keeping the heat in your home when the temperature plunges.

Call today and get a free survey and quote.

Meet the boss

Karl is the director of Homefit Doors. He set up the company after he quickly became aware of the advantages of the early composite doors produced in the 1990s.

He said: "Composite doors are so much more secure and heat-efficient than a wooden door.

"Your home will feel far safer and you will not get cold drafts with a composite door. They are also virtually maintenance-free, so your door will look good and offer peace of mind for years to come.

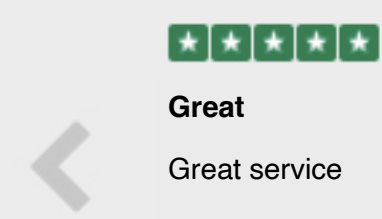

"We fit all the doors we supply because I want every fitting to meet Homefit staff's expectations and provide maximum customer satisfaction. A door put in by an inexperienced fitter will not look as good and is far less energy-efficient.

"Feel free to call me or one of my colleagues today – we will be happy to answer any questions you have.

"And remember, all our survey and quotes are provided free with no obligation to proceed."

But don't just take us at our word, read what our customers have to say about us.

Why Choose Homefit Doors to supply and install a composite door in Oldham?

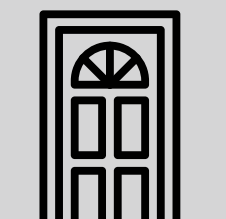

Customer communication

- ✓ A trained and experienced member of staff is available to talk through your door query Monday to Friday.

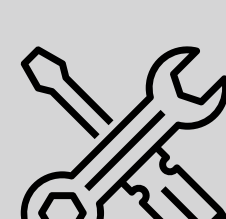

Free survey and quote

- ✓ The surveys and quotes we provide are free and there is no obligation to proceed.

Tailored composite doors

- ✓ All doors are manufactured in the UK to meet the customer's required size and specification for a perfect fit.

Fitting included

- ✓ All the doors we supply are fitted by our fully-trained specialists in Oldham.

Fitted at a time convenient to you

- ✓ We have supplied and fitted doors within days of being contacted by a customer, while others want the work done two months down the line. Just drop us a line and we will work within your timescale.

Up to a 10-year guarantee

- ✓ Whatever the manufacturer's warranty on the product is, we pass this straight onto you. Some manufacturers even give a 10-year guarantee.

What is a composite door?

Composite doors are constructed using a combination (or 'composite') of materials that make them far superior to standard doors.

They are designed to eliminate problems common to wooden doors, including weathering, colour fade, poor energy efficiency, fragility, and periodic maintenance and replacement.

Composite doors feature a steel security mesh, a hard-wearing PVC outer frame for optimum levels of thermal performance and strength, a reinforced structure, and hinges and locks designed to thwart burglars.

Composite doors are A-rated for thermal efficiency and will help to retain heat in the home thanks to an insulating core. They are also precision-manufactured so the door fits perfectly in the frame

There is a huge variety of door styles, colours, and glass design for maximum kerb appeal and the rugged design makes tiresome warping, cracks, and painting a thing of the past – composite doors can last decades with little or no maintenance.

Your questions answered

We usually like to answer customers questions directly, but here are some of the subjects we are often asked about. Remember, we can discuss your needs and queries if you call us for a friendly and no-pressure chat.

How energy-efficient are your composite doors?

All the doors we offer are A-rated for thermal efficiency thanks to the state-of-the-art manufacturing techniques and materials used in the doors we provide.

Can I see some examples of the quality of your work?

Am I under any obligation to proceed once you have completed my survey?

What qualifications do your door fitters have?
